Joni Harju

joni@joniharju.fi | (044) 299-4408 | Helsinki, FI | Portfolio | Linkedin
Software developer with over two years of experience with modern web development

WORK EXPERIENCE

Codekatu Oy   **Oct. 2022 – Present**

Software Developer

Key Projects:

- **Dead Set Bit Oy - Headless website**
  - o Successfully delivered a scalable, server-side rendered website for optimal SEO built with React(Next.js) and Sanity CMS for content management. Also configured google analytics, tag manager, recaptcha and cookie consent.
  - o Configured Sanity CMS from the ground up, allowing users to authenticate, edit existing content, create new pages, and publish blog posts.
  - o Proactively helped to further implement the design of the webpage and created figma prototypes

- **Loan Application Client**
  - o Developed a loan application website using React (Next.js) and MaterialUI
  - o Set up a custom backend with Strapi, PostgreSQL and S3-compatible MinIO bucket on a Hetzner VPS.
  - o Implemented multilingual support, enabling content management to edit and create new pages in three languages through Strapi.

- **Codekatu Oy - Internal CMS Tool**
  - o Designed and developed an internal CMS tool using React (Next.js).
  - o Set up and configured a PostgreSQL database using Prisma as ORM
  - o Implemented user authentication and email functionalities, enabling the website to send emails to customers.

- **Dead Set Bit Oy - Static website**
  - o Developed an efficient SEO-optimized static website based on client's design using vanilla HTML, CSS and JavaScript.
  - o Configured webpack from scratch to bundle assets and optimize the build process for production.
  - o Helped further implement the design of the page and created figma prototypes

EDUCATION

Tampere University of Applied Sciences   **08/2016**

Degree Programme in Business Information Technology

- Completed a game project in which I led a team of four as a Scrum Master. Additionally, my role also included sound design, music composition, and Java programming. The game was made for the Finnish Museum of Games as a school project.
