

Joni Harju

Software Developer

Software Developer with 2.5+ years of full-time work experience in modern web development, specialising in React, JavaScript/TypeScript and Java. Currently completing my Bachelor's degree in Business Information Technology at Haaga-Helia (graduating Spring 2027). Strong track record of building and shipping full-stack applications for clients, with hands-on experience delivering real-world projects.

PROJECTS

Dead Set Bit Oy - Headless Website (05/2024 - 08/2024)

- Delivered a scalable server-side rendered website optimized for SEO using React (Next.js) and Sanity CMS.
- Built and implemented a Sanity CMS solution enabling content editing, page creation, and publishing of blog posts.
- Integrated analytics (GA4, GTM) and implemented GDPR-compliant cookie consent.

Loan Application Client (09/2024 - 12/2024)

- Developed a loan application website using React (Next.js) and Material UI.
- Built a custom backend with Strapi, PostgreSQL, and object storage (MinIO) on a VPS.
- Implemented multilingual content management across three languages.

Codekatu Oy Internal CMS Tool (07/2023 - 12/2023)

- Designed and developed an internal CMS tool using React (Next.js).
- Built a PostgreSQL database using Prisma as ORM and deployed the application on Vercel.
- Implemented authentication (NextAuth.js) and email functionality for customer communication.

Codekatu Oy - Headless website (01/2025 - 03/2025)

- Developed an SEO-optimized marketing website using React (Next.js) and Strapi.
- Built backend infrastructure and deployment setup on a Hetzner VPS.
- Designed the website in Figma from a concept to approval and implemented it as a production-ready application.
